

# Toyota Land Cruiser FJ45 Pickup

Year model: 1984

GCC Spec

Chassis number: FJ45-416905

Engine Number: 2F843954

Colour: Mustard Yellow (532) / Cygnus White (012)

Mileage at time of restoration: 5900 KM

Extremely rare and unique factory specifications.

No other FJ45 known to exist worldwide with the complete factory bed wood option.

Extremely low genuine mileage and exceptional original condition upon acquisition.

Possibly one of the lowest mileage and original specimens of this model worldwide.

Last year of production with factory power steering.

The car was acquired from its original owner in March 2023 and shipped to Dubai, United Arab Emirates, where the car underwent a full body off nut and bolt restoration at Sebsports in Dubai using all OEM parts and years of experience.

Established in 2011, Sebsports is known as the regional leader in classic Toyota Land Cruiser restoration with more than 60 classic land cruisers restored since 2016.

The car was said to have been originally owned by a wealthy individual who kept the car in his holiday mansion in a remote and dry mountain region. The car was used sparingly around the property and for nearby travel, which allowed the vehicle to stay in such original condition with such low mileage.

Having the experience of having acquired and worked on 100's of these types of vehicles, Sebsports is confident of the originality of the condition as well as the mileage being genuine.

“Never before have we seen a classic FJ that has been so original, so untouched in such exceptional condition. A real gem. Couple that up with the never before seen factory bed wood option and you have a car that is unique in the world.”

Sebastian Husseini, owner and manager of Sebsports.

The vehicle underwent an extensive nine month baremetal body off restoration, all rubber and perishable items were replaced with new OEM parts, and all mechanical systems overhauled where required. Details can be provided.

High quality Glasurit paint system was used on the body and Akzonobel marine coatings were used for the chassis and drivetrain components. Professionlly executed application process prepares the car for the next 40 years of service.

Upgraded Old Man Emu deluxe suspension kit, for improved ride quality.

High quality Japanese alloy wheels in OEM style with 33” BFGoodrich KO2 tires.

Attached are pictures of the car in original condition when it was found, the restoration process as well as pictures upon completion.

Also attached are page copies of the OEM parts manual showing the factory bed wood. Till date no other FJ45 worldwide is known to exist with this factory option.

Car drives exceptionally well, as would be expected from a 6000 KM Toyota Land Cruiser.

Investment quality car that would fit well in any top-level collection, museum or if chosen ready for 50 years of hard work.

Estimated market value: USD 85,000 to USD 100,000.
